*Allowable Subject Matter*

1. This communication is in response to applicant's amendment which is filed July 19, 2005 in the application of Abrahamsson et al. for a "Transmission over packet switched networks" filed 05/09/2001 has been examined. This application claims foreign priority based on the application SE 0001727-7 filed May 10, 2000 in Sweden. The proposed amendment has been entered and made of record. Claims 9, 10 and 18 have been amended. Therefore, examiner has withdrawn the 35 USC 112 rejection of record. Applicant's remark with regard to the rejection under 35 USC 103 are persuasive. Applicant's statement of common ownership in support against the cited prior art has been recorded. Furthermore, the subject matter of both Andrsen et al. (US#2003/0167170) and the present application was owned by, and/or subject to an obligation of assignment to Global IP Sound AB.

2. Claims 1-20 are allowed as evident by applicant's amendment.

3. The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose or suggest a method of encoding a digitized sound signal and transmitting the coded digitized sound signal over a packet switched network with diversity, the method comprising steps of: encoding said digitized sound signal and its sound segments into at least two different descriptions with respective segment descriptions, each description being a representation of the sound signal with a respective set of quantization levels, wherein each sound segment is represented by at least two different segment descriptions; and transmitting, for

each one of said sound segments, each of said at least two different segment descriptions in separate data packets at different points of time, wherein a predefined time interval is introduced between the transmissions of two different segment descriptions of a sound segment; a method of receiving and decoding a coded digitized sound signal from a packet switched network utilizing the diversity provided by the received packets, the method comprising steps of: waiting a predetermined time period for reception of at least two different packets, the packets including different segment descriptions for one and the same sound segment; and one of the following steps of: decoding said sound signal segment based on a merger of said different segment descriptions included by said at least two different packets, if said different segment description are received within said time period, and decoding said sound signal segment based on those, one or a merger of more than one, different segment descriptions that were received within said time period, as specifically recited in claims.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Man U. Phan whose telephone number is 571-272-3149. The examiner can normally be reached on Mon-Fri, 6:00AM - 3:00PM.
